PIONEER™**

SIDE-BY-SIDE LINEUP

INNOVATION BY YOUR SIDE

BEST ON EARTH™

LEADING THE WAY

The 2015 Honda Pioneer Side-by-Side Lineup

As a pioneer in leading technology, it's no wonder Honda has a lineup with this very name. The Pioneer side-by-side lineup combines Honda's legendary durability, quality and reliability with the kind of innovation Honda customers have come to expect. Last year, the introduction of the Pioneer 700 series to the Honda powersports family opened new doors for customers and allowed greater opportunity to enjoy the outdoors with friends and family. And for 2015, the Pioneer 500 adds to the already versatile lineup with a 50" width that makes taking the trails that much easier. The benefits of a passenger-carrying vehicle can be applied across the many activities in which Canadians enjoy throughout all four seasons. Whether it's for hunting, fishing, working or exploring the trails, Honda has Pioneer models, along with customizable accessories, that can be tailored for any experience or task. With Honda engineering and industry-unique features, the Honda Pioneer lineup has been built with all Canadians' needs in mind. Honda is leading the way.

The 2015 Honda

PIONEER[™] 500

Trust Honda to Take You Anywhere

The all-new Pioneer 500 is built to tackle the workdays and the weekends. With a trail-ready width of only 50", this side-by-side gets you into places others can't and even transports in the back of a full-sized pick-up truck. To help ensure you can take everything you need, the ATV-style cargo rack offers maximum load versatility at 203 kg (450 lbs.). Powering the nimble side-by-side is Honda's proven engine with the efficiency of sideways mounting and an electric-shift system featuring paddle shifters providing seamless transitions between gears - putting you in control. Choose between 2WD and 4WD and you have all the convenience of a side-by-side in a more manageable package. The all-new Pioneer 500 is the perfect balance between recreation and light utility.

PIONEER 500

INNOVATIONS

1. Narrow Overall Width

Whether it's for a trail restricted to 50-inch overall width, or the convenience of not having to buy a trailer, the Pioneer 500 can go where just about no other side-by-side can!

2. Fun, Sporty Ride

With 149 mm (5.9 in.) of travel on all wheels and 243 mm (9.6 in.) of ground clearance, the new Pioneer 500 can negotiate tough trails with ease. And the Pioneer 500's suspension is tuned for a fun, sporty ride too.

3. Two-Person Seating

With a comfortable bench-style seat, individual backrests and seatbelts for both rider and passenger, the Pioneer 500 offers side-by-side comfort and excellent manoeuvrability.

4. Paddle Shifter

Upshift and downshift without ever having to take your hands off the wheel. You get to choose the exact gear you want for challenging terrain, and it's engineered for precise, smooth shifts.

5. Single Operation Door/Net

The Pioneer 500 comes standard with doors, and the occupant net is directly attached—just unlock and open the door, and the net automatically swings aside making entry and exit easier.

6. Selectable 2WD/4WD

Our rock-solid system lets you choose either 2WD or 4WD, giving you the freedom to choose between lighter steering (in 2WD) and maximizing available traction (in 4WD) when you need it most.

7. Strong Gearbox

Unlike the belt-drive automatics out there, the Pioneer 500 features a transmission that uses rugged, steel gears. You get true compression braking for superior controllability (especially when descending hills), as well as long transmission life.

8. Open Front Differential

The front differential's open design makes steering easier and more precise, even in four-wheel drive.

9. Locked Rear Axle

With the IRS rear end and a locked-axle design, the Pioneer 500 gives you great traction and a smooth ride.

13. Liquid Cooling

Our time-tested Honda engine is liquid-cooled, which provides more consistent operating temperatures and more power than a comparable air-cooled motor. This adds up to better performance and longer engine life.

10. Independent Rear Suspension

The Pioneer 500's fully independent rear suspension means you get a smooth ride and great traction, especially over rough terrain.

14. Semi-Dry-Sump Engine

Compact and lighter weight, the Pioneer 500's overhead-valve, semi-dry-sump design creates an engine that's not only shorter from top to bottom, but one that enhances handling by lowering the center of gravity and increasing ground clearance.

11. Longitudinal Engine Mounting

The Pioneer 500 is built around our strong, single-cylinder, 475cc longitudinal engine. By orienting the crankshaft front to back in the chassis, we route the flow of power straight to the wheels without any right-angle detours, reducing powertrain friction and putting more grunt to the ground.

15. All-new Rear Carrier Design

With the unique steel rear carrier design, the Pioneer 500 gives you tremendous versatility when it comes to securing loads. Special tiedown-hook securing points make it even easier. And the rack's 450-pound rating gives you plenty of carrying capacity, too.

12. Closed-Loop Fuel Injection

Better cold-weather and high-altitude running, effortless startups, great fuel efficiency and less pollution—that's what the Pioneer 500's "closed loop" fuel-injection system means—a first in the industry.

16. 1,000-Pound Towing Capacity

The Pioneer 500 has a heavy-duty receiver-style hitch and 450 kg (1,000 lbs.) towing capacity.

The 2015 Honda

PIONEER[™] 700

Get the Job Done

Honda's do-it-all Pioneer 700 has taken the side-by-side world by storm, and now it has a new dual-rate suspension designed to deliver a smooth ride while still providing plenty of travel and superior load-carrying capacity. This versatile, two-passenger machine features a tilt cargo box to complement its heavy-duty drivetrain and chassis making the tough jobs a little easier to manage. Furthermore, its drivetrain features an automotive-style Honda Automatic transmission with a heavy-duty torque converter akin to the transmission used in trucks, which is unique for its class. The 675 cc liquid-cooled engine features fuel injection for easy cold starts and flawless operation in a wide range of conditions. The fully independent suspension offers a smooth ride and confidence over rough terrain. The rugged Occupant Protective Structure, as well as standard doors and side nets help enhance your safety and offer peace of mind. Whether used for work or for fun, the Pioneer 700 will quickly become your most trustworthy partner.

Cargo Hauler

The 2015 Honda

PIONEER[™] 700-4

One-of-a-kind.

You won't find another side-by-side like it — the 2015 Pioneer 700-4 with folding in-bed passenger seats features an innovative design that offers unprecedented flexibility to facilitate all kinds of jobs and activities. Need to haul some serious cargo? With the seats folded down, you've got a 454 kg (1000 lb) capacity cargo box that's easy to load and even easier to dump - thanks to its hydraulically assisted tilt feature. Want to comfortably carry up to three additional passengers? Just flip up one or both of the hidden bed-mounted seats and you're set to offer a smooth trail-riding experience thanks in part to the 700-4's new front dual-rate suspension - designed to deliver a smooth ride, plenty of travel and superior load-carrying capacity. With its advanced 700-class engine, a durable, mechanical automatic transmission with a heavy-duty torque converter, the 700-4 can tow up to 680 kg (1500 lb) so you can bring along whatever you need. Finished with aggressive styling and available in three colour options (Red, Metallic Silver, or Honda Phantom Camo[™]), the Pioneer 700-4 will take you, and whatever you choose to bring along, wherever you want to go.

Revolutionary Design. The first-ever convertible 4-seater side-by-side.

Tilt Box

PIONEER 700 SERIES

INNOVATIONS

1. 2-3-4 Seating Configuration

The Pioneer 700-4 features the industry's first convertible rear seating design that offers the convenience and versatility of switching between two, three or four-person seating configurations, and provides full bed space and tilt function while in the two-person configuration.

2. Honda Phantom Camo®

The Pioneer 700 is available in Red, Olive, and our Honda Phantom Camo™, designed to blend in and work in a large variety of locations and terrain. The 700-4 also offers Honda Phantom Camo™, as well as Red and a stunning Metallic Silver.

3. Occupant Protection Structure

We built the Pioneer series Occupant Protection Structure around the driver and passenger(s), and positioned the seats so you're well protected. Built out of sturdy, large diameter tubing, the Occupant Protection Structure includes such details as integrated handholds, recessed top tubes and a more spacious structure to enhance protection. It also meets OSHA's 1928.53 rollover protection standard.

4. Seatbelts

The Pioneer series features automotive-style three-point belts with an Emergency Locking Retractor mechanism to help keep you and your passenger safe and secure.

5. Contoured Bench Seat

The Pioneer 700 series driver and passenger contoured bench seat provides lots of room and allows easy entry and exit.

6. Double-Latch Doors

The Pioneer 700 series comes standard with doors, featuring an automotive style double latching system securing you and your passengers in while keeping out what nature throws at you.

7. Side Nets

The Pioneer series comes standard with roll-up side nets, making cleaning and maintenance easier.

8. 37.5 Watt Single-Filament Headlight

The headlight has excellent balance and light-distribution, eliminating uneven light patterns and dark zones within the headlight's lighting area.

9. 450-Watt Power Capacity

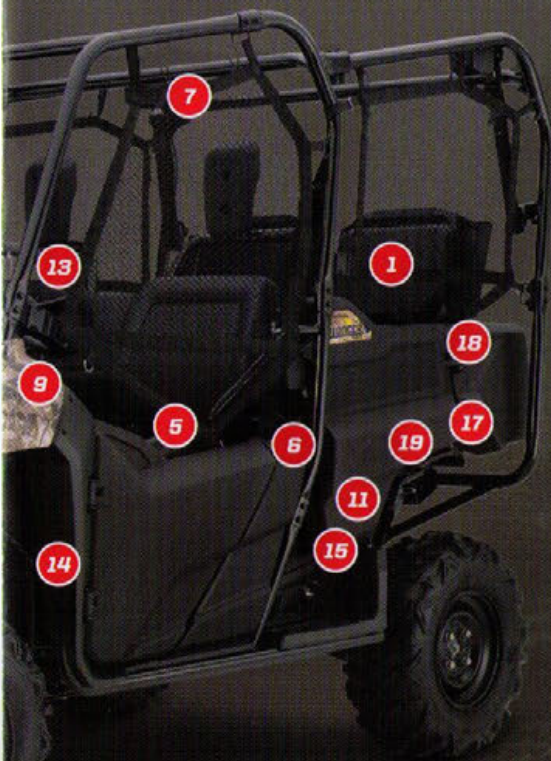

The 450-watt charging system provides plenty of power for everyday use, but allows extra capacity for your accessories. Please consult the accessory instructions for specific power requirements.

10. Disc Brakes

The Pioneer 700 series features powerful triple disc brakes. On the two front 200 mm brake discs, a patented scraper system helps prevent debris buildup between caliper and rim. An inboard-mounted rear 170 mm brake disc saves weight and is better protected from rocks or other debris.

Pioneer 700-4 model shown

13. Tight Turning Radius

The Pioneer series is manoeuvrable, as shown by its tight turning radius, a big help if you're in tight, technical terrain.

17. Tilt Box

The Pioneer series is built to work, and to make your big jobs easier we've equipped it with a tilt box featuring a hydraulic-assist strut.

14. 675cc Liquid-Cooled Engine

The liquid-cooled four-stroke single-cylinder has tons of torque and plenty of power. Fuel injection means it starts right up, even on cold days or at high altitude. A new intake design helps minimize dust and particulate ingestion. And the Pioneer's engine is rubber-mounted on a separate subframe to reduce vibration.

18. 1,000-Pound Cargo Bed Capacity

Side-by-sides are built to hold cargo, and the Pioneer series is ready to get to work. The bed capacity can hold up to 454 kg (1,000 lbs.).

11. Adjustable Preload Rear Shocks

In addition to a fully independent rear suspension with 230 mm (9.1 in.) of travel, the rear shocks feature preload adjustability to handle the Pioneer series' generous load capabilities.

15. Honda Automatic Transmission

A stout, heavy-duty torque converter with three hydraulic clutches and positive engine braking. It's smart too - it features a two-stage shift map to optimize power delivery through the engine's RPMs.

19. 1,500-Pound Towing Capacity

The Pioneer 700 series has a heavy-duty two-inch receiver-style hitch and a 680 kg (1,500 lbs.) towing capacity.

12. Independent Double-Wishbone Front Suspension

Front independent double-wishbone suspension with 200 mm (7.9 in.) of travel contributes to the Pioneer series' all-day riding comfort.

16. 2WD/4WD Differential Lock

When you're in 4WD mode, and you need to get the power to both front wheels, just push the knob to the right and the differential locks to maximize available traction.

20. Honda Tough, Honda Value

Featuring well thought-out details like a standard water-resistant glovebox door and patented strut system for the folding seats, this is a vehicle that gives you a lot more for your hard-earned dollar.

Why Honda?

Honda has built a reputation on superior design and innovation, strong performance and legendary durability, quality and reliability. Owning a Honda means having the confidence that your side-by-side is a superior product that will get you back home at the end of the day. It also means that you have the support of Honda dealers and technicians who are trained to maintain the original quality of your product throughout its lifetime. High quality products, dealer support and customer satisfaction – that's why so many people choose Honda.

Plus

Honda Financial Services and Honda Plus

At Honda Financial Services, we aim to make your financing experience as simple as possible. For additional peace of mind, our Honda Plus protection covers most repairs for the duration of your plan. Choose from a wide variety of options to suit your lifestyle.

SXSBR015E

Riding a motorcycle, ATV or side-by-side can be hazardous. Honda Pioneer is recommended for drivers 16 years of age and older, and tall enough to wear the seat belt properly and reach all the controls. The passenger should also be tall enough for the seat belt to fit properly and brace themselves, if needed, by placing both feet firmly on the floor while grasping the hand hold. For your safety always wear a helmet, eye protection and protective clothing whenever you ride. Never ride under the influence of drugs or alcohol. Never engage in stunt riding. Inspect your vehicle before riding, read your owner's manual, and Honda recommends that all riders take a rider training course. Always obey local laws, use common sense and respect the rights of others when you ride. Whenever you ride off-road, always stay on established trails in approved riding areas. Make sure you obtain written permission before riding on private land. Keep your riding area clean and never modify the spark arrestor or exhaust system. Visit honda.ca for additional safety information.
