SIDE-BY-SIDE

PIONEER™

SIDE-BY-SIDE

BILLS CYCLE

POWERED BY **HONDA**

THE ADVENTURE BEGINS HERE

Life is an adventure meant to be explored. With nearly 50 years of rugged Honda off-road innovation at the core of every Honda Pioneer, we certainly never settle for anything less than our very best off-road machines.

Expertly engineered to take on the most challenging terrain our nation has to offer, our proven quality and exclusive technology help create the ultimate off-road experience to make the most out of every outdoor activity.

The Honda Pioneer side-by-side lineup offers adventure in every shape and size - absolutely trusted to take you just about anywhere and back with legendary off-road capability and industry-leading innovation on your side. After all, it's your life, Honda side-by-side just makes it more fun!

Pioneer 700

Pioneer 1000 EPS LE

PIONEER 1000

Let nothing stand in your way with the flagship Pioneer 1000, with seating for up to five passengers or three people with a bed full of cargo. Armed with a class-leading 999 cc engine and the most advanced dual-clutch transmission (DCT) ever found in a side-by-side, it's time to take work and play to a whole new level of fun.

MAKE EVERY DAY AN ADVENTURE

Designed for fun adventures at every turn, the all-purpose Pioneer 700 and 700-4 feel right at home riding rough trails and being put hard to work. Both of these multi-task machines come standard with all the great features you can count on from Honda: a fuel-injected 675 cc powerhouse of an engine that you can trust to be super-reliable; an automotive-style automatic transmission with no belts to worry about; full doors, nets and other safety gear; and a chassis that's built to take a beating while also providing the predictable, controlled handling that's a hallmark of all Honda off-road vehicles. New for 2017, all Pioneer 700 models feature an updated front bumper design, upgraded front/rear torsion bars and unfasten seat belt speed limiter.

PIONEER™ 700/700-4 DELUXE

Pioneer 700 Deluxe models now come with Electric Power Steering (EPS), automatic transmission with AT/MT mode, plus aluminum wheels and exclusive graphics. Trails, wilderness, cottage, farm or job site - the Pioneer 700 and 700-4 Deluxe models can't wait to show you all they can do.

ELECTRIC POWER STEERING

The added comfort of electric power steering helps lessen steering effort and eliminate bump steer, especially when travelling over rocks or on rough side hills.

SHIFTING OPTIONS

Sporty steering wheel mounted paddle shifters allow you to choose any gear manually without ever removing your hands from the wheel. Or, if you like, you can let the automatic Honda transmission do all the shifting for you.

ATTENTION TO DETAIL

Deluxe models boast stylish aluminum wheels that look great while helping reduce unsprung weight for improved handling and ride comfort. Painted suspension springs along with a new front bumper add to its rugged and recognizable off-road design.

PIONEER™ 700

It's all here

Honda quality, reliability and technical innovation, in side-by-sides that set the standard for versatility, value and fun.

ADVANCED TRANSMISSION

The automotive-style automatic transmission uses a heavy-duty torque converter with three hydraulic clutches. It's tough, with no belts to worry about and smart. A two-stage shift map senses when you're aggressive or light with the throttle and optimizes power delivery accordingly.

DYNAMIC RIDE & COMFORT

Front independent double-wishbone suspension with dual-rate springs provides a substantial 200 mm (7.9 in.) of travel for excellent handling and all-day riding comfort.

2WD/4WD/DIFF LOCK

When you're in 4WD mode and you need extra traction, just use the lever on the Pioneer 700's dash and the front differential locks to give you extra grip in the toughest situations.

TRIPLE DISC BRAKES

A patented scraper system on the two front 200 mm disc brakes helps prevent unwanted debris buildup between caliper and wheel. An inboard-mounted rear 170 mm brake disc saves weight and is better protected from rocks and other debris.

SUPERIOR MANOEUVRABILITY

Need to make a tight turn? Tip-toeing through tricky terrain? A tight turning radius makes it easy to manoeuvre out of almost any situation.

SAFETY FIRST

The sturdy Occupant Protection Structure, standard doors with an automotive-style double latching system, roll-up side nets, and three-point belts, all help keep you and your passengers safe and secure.

Pioneer 700-4 model shown

2-3-4 SEATING CONFIGURATION

(700-4 EPS/DELUXE MODEL)

The Pioneer 700-4 features innovative QuickFlip™ convertible rear seating that offers the convenience and versatility of switching between two-, three- or four-person seating, and provides full bed space and tilt function while in two-person mode.

READY FOR WORK

The tilt box with hydraulic-assist strut can hold up to 454 kg (1,000 lbs.), while the heavy-duty two-inch receiver-style hitch is ready to tow up to 680 kg (1,500 lbs.).

KEY SPECIFICATIONS

BILLS CYCLE

POWERED BY HONDA

BIG FUN IN A COMPACT PACKAGE

The sporty and compact Pioneer 500 is a fully capable off-road machine that's also a blast on challenging technical trails. Designed with a narrow 50-inch width, the agile Pioneer 500 can tackle tight trails and reach places other side-by-sides simply can't and it'll even fit in the back of most full-size pickup trucks.

The Pioneer 500 boasts a fuel-injected longitudinally-mounted 475 cc engine mated to a five-speed electric-shift transmission with ultra-low first gear for additional off-road ready torque.

New for 2017, the Pioneer 500 features an automatic transmission with AT/MT mode and steering wheel mounted paddle shifters. Plus dual-rate suspension springs and increased reverse speed from 9 km/h to 15 km/h.

With a very versatile ATV-style cargo rack, switchable 2WD/4WD, and a roomy cab for two, the Pioneer 500 gives you side-by-side practicality blended with the nimble handling and go anywhere fun of an ATV.

PIONEER™ 500

BILLS CYCLE
POWERED BY **HONDA**

A new twist on the side-by-side formula

Loaded with high-tech features and designed to do things and go places other side-by-sides can't. That's the special appeal of the Pioneer 500.

ROOMY SEATING

With a comfortable and contoured bench-style seat, individual backrests and seatbelts for both riders, the Pioneer 500 assures comfort and security while you concentrate on having fun.

IMPROVED HANDLING

Tuned for a fun and sporty ride, the independent front and rear suspension feature new dual-rated springs for 2017. This provides a more comfortable and easily controlled ride over all types of difficult terrain.

EASY ENTRY

The clever automotive-style rear-hinged door design comes standard, which allows the nets to remain attached when opening doors for easy entry and exit.

LONGITUDINAL ENGINE MOUNTING

The Pioneer 500 is built around a reliable 475 cc longitudinally-mounted Honda engine. By orienting the crankshaft front to back in the chassis, the flow of power is routed straight to the driveshafts without right-angle detours. It's designed to reduce powertrain friction and put more grunt to the ground.

HAULING & TOWING

The large and flat cargo area with ATV-style rack offers numerous tiedown-hook points for tremendous cargo versatility and 203 kg (450 lbs.) of carrying capacity. Plus, a heavy-duty receiver-style hitch with a 454 kg (1,000 lbs.) towing capacity when you need it.

NARROW WIDTH

Whether you ride on trails with width restrictions, need a narrow vehicle for manoeuvring through forests or other obstacles, or want a side-by-side that's easier to transport, the Pioneer 500's compact 50-inch width makes sense for a whole bunch of reasons.

SELECTABLE 2WD/4WD

The Pioneer 500 lets you choose either 2WD or 4WD, giving you the freedom to select between lighter steering in 2WD and maximum available traction in 4WD depending on conditions.

PADDLE SHIFTING

Upshift and downshift without ever having to take your hands off the wheel. Engineered for precise, smooth shifts, you can choose the exact gear you want for challenging terrain or let the automatic transmission do the shifting for you.

KEY SPECIFICATIONS

BILL'S CYCLE
POWERED BY HONDA

BE A RESPONSIBLE SIDE-BY-SIDE RIDER

At Honda, we believe in performance and leadership, and that's why we're taking a leadership position when it comes to the environment. We continue to develop low-emission technologies for our current and future motorcycles, ATVs, side-by-sides and scooters. We already produce models that exceed the stringent California Air Resources Board (CARB) emissions requirements.

And that's the kind of performance everybody can appreciate.

Riding a side-by-side is an exercise in responsibility—to yourself, to others and to the environment. So remember, ATVs and side-by-sides can be hazardous to operate. For your safety, wear a helmet, eye protection and protective clothing, and never ride on paved surfaces or public roads. Never carry passengers and never engage in stunt riding. Avoid excessive speeds and be particularly careful on difficult terrain. And keep in mind that riding doesn't mix with drugs and alcohol.

Honda Genuine Parts are made for your Honda. They maintain the quality, reliability and performance of your product. When the time comes for you to service, repair or enhance your Honda, don't settle for an imitation. Only Honda Genuine Parts can maintain the original operating specifications of your Honda and offer a perfect fit every time. Let trained Honda technicians keep your Honda healthy with Honda Genuine Parts.

Honda builds its side-by-side models to meet some of the toughest engineering standards in the world, and formulates its oils to those same high standards, thereby maintaining your Honda at peak performance. You bought a Honda because of its quality, performance and reliability. Why not match one of the finest products you can own with some of the finest oils on the market. Don't settle for an imitation when you can buy the original.

Plus

Honda Warranty = Peace of mind. Designed to ensure Honda quality care for your side-by-side, Honda Plus Extended Warranty offers flexible coverage selections for the type of protection you need. Whether your Honda side-by-side is new or pre-owned, Honda Plus helps to cover you.

PIONEER™ 1000

BILL'S CYCLE

POWERED BY **HONDA**

DISCOVER THE ULTIMATE SIDE-BY-SIDE

The great outdoors are meant to be explored and experienced. Let the adventure-ready flagship Honda Pioneer 1000 EPS and 1000-5 EPS lead the way, with powerful 999 cc performance, proven off-road prowess and an industry-first 6-speed Dual-Clutch Transmission (DCT). Plus, fully selectable driveline that lets you choose between 2WD and 4WD drive, and open or locked differentials. The long-travel independent suspension ensures a smooth, controlled ride, delivering incredible off-road performance with over one full foot of ground clearance. From the highest hills to the deepest woods, simply nothing compares to the bigger and better 2017 Honda Pioneer lineup.

PIONEER™ **1000-5 EPS LE** **1000 EPS LE**

The Pioneer 1000 EPS LE and 1000-5 EPS LE (Limited Edition) models offer a new level of premium performance and side-by-side features including upgraded Fox sport suspension with red-painted components, an aluminum skid plate, new aluminum wheels, front bumper guard with painted body panels, and exclusive limited edition graphics. You'll also find clever new under seat and under dash additional storage with handy front and rear cup holders with improved seating comfort. Designed for rugged outdoor adventures and making quick work of tough tasks, each Pioneer 1000 model is engineered to deliver the ultimate side-by-side experience.

Pioneer 1000 EPS LE

Pioneer 1000-5 EPS LE

HILL START ASSIST

The handy Hill Start Assist (HSA) feature is designed to easily get you going from a standstill, particularly when towing or carrying a load. When activated, HSA automatically maintains sufficient brake pressure so you can move your foot to the gas pedal and be on your way. No more need to 'heel-and-toe it' when climbing hills.

NEW INTELLIGENT 4WD

Using advanced Honda automotive technology, Intelligent 4WD (I-4WD) includes Brake Traction Control System (BTCS), Hill Start Assist (HSA), and Electronic Brakeforce Distribution (EBD). When I-4WD is engaged, BTCS applies additional drive to the tire with more grip, providing better traction on-the-fly without the heavy feel of a differential lock.

FOX SUSPENSION

Upgraded premium Fox shocks combine with generous travel from the independent front and rear suspensions to assure a smooth, fun and well-controlled ride with plenty of ground clearance.

COLOURS

PIONEER 1000 EPS

PIONEER 1000-5 EPS

PIONEER™ 1000

Nothing comes close

Engineered for rugged outdoor adventures and designed for making quick work of tough tasks, each Pioneer 1000 model is engineered to deliver the ultimate side-by-side experience.

BILLS CYCLE
POWERED BY HONDA

ADVANCED TRANSMISSION

The fully automatic Honda six-speed Dual-Clutch Transmission (DCT) senses how you ride, monitoring throttle input, engine rpm, vehicle speed and more. Going downhill? The Pioneer stays in a lower gear for superior engine braking. If you want to choose a specific gear, upshift or downshift in demanding conditions or override the automatic gear selection, the paddle shifters make it easy and fun. And of course, there are no pesky belts to repair, replace and worry about with a proven Honda gear-on-gear transmission on your side.

MULTIPLE DRIVE MODES

The Pioneer 1000 EPS and 1000-5 EPS allow you to quickly and easily choose from 2WD, 4WD, 4WD with differentials locked for the toughest conditions, or Turf mode that's perfect for easier steering and more sensitive surfaces like yards, grass and fields. All via a dash-mounted lever.

TACKLE ANY TERRAIN

Venturing over really tricky, rocky terrain, hauling heavy cargo down a steep hill, or need some real hill-climbing ability? The high/low-range sub-transmission provides a full 42-percent gear reduction when you switch to the low range.

SMOOTH RIDE

The 268 mm (10.55 in.) of travel from the front independent suspension and 254 mm (10 in.) of travel from the rear independent suspension offers a smooth, well-controlled ride with generous ground clearance. Plus, the rear suspension of the Pioneer 1000-5 EPS automatically senses weight and adjusts ride height to compensate (self-leveling rear suspension) to maintain ground clearance, maximize handling and increase passenger comfort.

ELECTRIC POWER STEERING

The automotive-style Honda Electric Power Steering lessens steering effort and helps eliminate bump steer, especially over rocks, logs and on sidehills. Plus, a tilt steering wheel lets you find a position that's just right for you.

FOUR-WHEEL DISC BRAKES

With Honda side-by-sides as powerful and capable as these, you need brakes that are up to the job, too. The extensive automotive experience of Honda means you know the all-wheel disc brake system is up to the task.

POWERFUL TOWING CAPACITY

You can load a half-ton (454 kg/1,000 lbs.) into the bed of both the Pioneer 1000 EPS and 1000-5 EPS. And when it's time to unload, the bed's hydraulic-assisted tilting feature makes it easy. And because they're able to tow a full ton (907 kg/2,000 lbs.), both models can take on big jobs that otherwise would require a tractor or a truck.

FLEXIBLE SEATING (PIONEER 1000-5 EPS & LE MODELS)

The Pioneer 1000-5 EPS gives you ultimate flexibility in seating options. In addition to the comfortable three-passenger contoured bench seat up front, the bed incorporates a pair of QuickFlip™ seats that flip up or fold down independently in seconds. Up, they provide secure seating for one or two additional passengers; down, you get a flat cargo bed for utility use.

2017 MODEL UPDATES

New for 2017, the Honda Pioneer 1000 EPS and 1000-5 EPS models now both include key features and updates from convenient winch pre-wiring and new torsion bars to additional drivetrain refinement and improved seat comfort.

SUPERIOR PROTECTION

The Occupant Protection Structure uses large-diameter tubing and includes integrated handholds, recessed top tubes and a more spacious structure to enhance protection. Hard doors and roll-up side nets provide a secure feel and keep mud and debris out of the cabin, while automotive-style three-point belts with an Emergency Locking Retractor mechanism help keep everyone secure.

KEY SPECIFICATIONS

ENGINE

999 cc liquid-cooled longitudinally mounted Unicam parallel twin-cylinder 4-stroke
