GO BEYOND

POWERED BY HONDA

EXPERIENCE
ENDLESS FREEDOM

This is where it all begins. A whole new world of endless freedom is out there, just waiting to be discovered — creating everlasting memories forever etched into your mind. It's in our nature to explore what lies beyond, to seek the unexpected and to experience life in the most vivid ways imaginable — one great ride at a time.

GOLD WING | 2018

BILL'S CYCLE

BILL'S CYCLE
POWERED BY **HONDA**

BILL'S CYCLE IT'S 1975: THE LEGEND TAKES FLIGHT

They say timeless things never get old. Since making its debut back in 1975, the original Honda Gold Wing — known then as the Honda GL1000 — played a major role in establishing the motorcycle touring category. The Gold Wing went on to not only set the standard to which all future touring motorcycles continue to be compared to today, but also earn itself a highly coveted reputation among long-distance riders for impeccable luxury, advanced technology and proven performance. Over the years many things sure have changed, but the legendary Gold Wing remains our ultimate performance touring machine, well deserving of its authentic flagship status for decades later.

1975 – GL1000 GOLD WING

Touring is born. And no one saw it coming. Powered by a 999 cc liquid cooled horizontally opposed four-cylinder engine, the original GL1000 marked a significant shift in moto culture, inspiring an entirely new way to ride.

1985 – GL1200 GOLD WING LIMITED EDITION

The Gold Wing's 10-year anniversary saw the end of the naked fairing GL. The luxurious Limited Edition arrived with programed fuel injection, cruise control, auto-levelling suspension, metallic gold paint and comfort features galore, including intercom between rider and passenger.

1995 – GL1500 GOLD WING 20TH ANNIVERSARY

The Gold Wing did more in its first 20 years than any other bike. Honda celebrated this 20th anniversary with the release of three commemorative models and a special hardcover book detailing its entire history to this point.

2005 – GL1800 GOLD WING

For the 30th anniversary, the Gold Wing received multiple new colours and upgrades, followed by the addition of in-dash GPS, heated grips and seats, plus world's first optional motorcycle airbag in 2006. Yet there was one other major milestone to celebrate: at this point, over 500,000 Gold Wings had been built worldwide.

BILL'S CYCLE TODAY, THE LEGEND GOES BEYOND

BILL'S CYCLE
POWERED BY **HONDA**

Discover the true feeling of freedom with the all-new 2018 Honda Gold Wing. Representing one of the greatest achievements in motorcycle touring performance and technology, the 2018 Gold Wing is destined to add a new chapter to the ever-evolving Honda legacy. Get ready to experience a legend in the making, known for separating tourists from travellers and turning every ride into a memorable story worth telling.

2015 – GL1800 GOLD WING 40TH ANNIVERSARY

Back in 1975, no one predicted the Gold Wing would inspire a global fan following spanning over four decades. The 40th anniversary model signified this crowning achievement with special commemorative edition badging and embossed seating, upgraded two-tone paint, new layered surface bodywork and refined touring features alongside its proven 1832 cc six-cylinder engine.

2018 – GOLD WING TOUR DCT AIRBAG & GOLD WING

The highly anticipated all-new Gold Wing debuts with a completely new flat six-cylinder engine, electronically controlled front suspension and styling with LED lighting and a new removable trunk option. As the most advanced bike in its class, it includes more features than ever before, including Apple CarPlay™, 7-inch TFT display, smart key fob and advanced ride technology, plus optional airbag and choice of traditional six-speed manual transmission or advanced seven-speed Dual-Clutch Transmission (DCT).

ICONIC DESIGN

Blending modern design with iconic attitude, the 2018 Gold Wing offers a visually more menacing shape with all-new aggressive styling that refuses to be ignored. Flowing seamlessly from tip to tail — right down to the most meticulous detail — the Gold Wing brings new meaning to aerodynamic efficiency in the touring motorcycle category. The attractive all-new styling has long-distance comfort written all over it, with distinctively bright LED lighting, an electronically adjustable windscreen and removable trunk storage, plus revised ergonomics to make the most of every moment spent riding the open road. The legendary Gold Wing spirit still shines through an impressive choice of new premium colour options and a sharper, more sveltely sculpted physique — striking the ideal balance between comfort and performance worthy of the Gold Wing name.

BILL'S CYCLE

REMOVABLE TRUNK STORAGE

While the 2018 Gold Wing features legendary comfort and handy storage capacity, it also goes beyond with an all-new removable rear trunk. Ideal for shorter trips, solo riders or those seeking a sleeker look, the choice is yours.

NEW WHEEL DESIGN & TPMS

The attractive all-new wheel design adds to the overall upscale styling, connecting to the road with a wide 200 series rear tire with standard Tire Pressure Monitoring System (TPMS).

ELECTRONICALLY CONTROLLED FRONT SUSPENSION

Underneath it all is a totally redesigned and electronically controlled front end suspension, allowing for a responsive ride and even better handling. The completely new chassis also contributes to an 80-pound weight reduction from its predecessor.

ADVANCED LED LIGHTING

The new LED headlight and rear LED tail light design help deliver brilliant brightness and distinctive good looks that are sure to get noticed, plus new angular mirrors with integrated self-cancelling LED turn signals.

ADJUSTABLE ELECTRIC WINDSHIELD

Every touring rider can appreciate the extra wind and weather protection with the integrated and fully adjustable electric-powered windshield — effortlessly changing height to suit your preference.

ALL-NEW STYLING

Front to back, the highly anticipated 2018 Gold Wing is a complete reinvention, with a lower, swept-back touring design and a strong shoulder line — giving the Gold Wing all-new premium styling and an all-new frame.

BILL'S CYCLE
POWERED BY **HONDA**

ADVANCED TECHNOLOGY

You can't have an all-new Gold Wing without all-new technology, as the 2018 Gold Wing is a tech-savvy force to be reckoned with. Being no stranger to innovation, the 2018 Gold Wing includes a lengthy new list of advanced electronics, connectivity and entertainment, featuring an available motorcycle industry first — introducing Apple CarPlay™ with Siri®. Enjoy seamless CarPlay™ integration with your compatible phone's navigation, apps, music and additional services, plus convenient access to weather, playlists and phone numbers right at your fingertips. Every new Gold Wing and Gold Wing Tour is also equipped with a big bright 7-inch full-colour screen. The addition of standard Bluetooth® with available Bluetooth headset, standard USB connector and an optional high-output audio system are just a few more of the state-of-the-art surprises that will turn every ride into a great escape.

STANDARD BLUETOOTH CONNECTIVITY

Seamlessly connect compatible electronic devices via standard Bluetooth connectivity, available on all Gold Wing and Gold Wing Tour models to conveniently enjoy MP3, iPod® and USB integration onboard.

7-INCH NAVIGATION & AUDIO DISPLAY

The 2018 Gold Wing and Gold Wing Tour models feature an all-new dashboard, with an intuitive 7-inch LCD display, housing a Harman Navigation system with premium audio and a host of all-new technology.

SMART KEY

For those seeking the ultimate convenience and security – the electronic smart key never has to leave your pocket. Every Gold Wing model uses a proximity smart key system to conveniently open storage compartments and start the bike at the touch of a button.

APPLE CARPLAY™ WITH SIRI®

Take the things you want to do with your compatible iPhone® and put them right on the built-in Gold Wing display screen with Apple CarPlay™. Use apps, get directions, make calls, send and receive messages, and listen to music through onboard controls or take advantage of Siri® Voice Recognition.

AIRBAG SYSTEM

There's nothing else like it in all of motorcycling. Tucked unobtrusively behind a dash panel on the fully equipped Gold Wing Tour DCT Airbag model, the airbag system inflates instantaneously when sensors detect serious frontal impact or a collision in progress.

LEGENDARY PERFORMANCE

Famously smooth and plenty powerful, the iconic horizontally opposed six-cylinder engine remains at the chest-pounding centre of the Gold Wing. The new engine and powertrain have been updated to be more compact, fuel efficient and versatile in real-world riding application, while also increasing overall power, response and agility. Another leap forward in Gold Wing performance comes from the introduction of a new throttle-by-wire system, available Honda Selectable Torque Control (HSTC) and selectable riding modes available on all Gold Wing models. Featuring four individual settings, it's easy to switch between Sport, Touring, Eco or Rain modes to automatically adjust to riding conditions. The intake and exhaust systems have also been tuned for touring, with more power and torque, while creating a distinct Gold Wing rumble you can't wait to hear open up.

NEW ENGINE AND POWERTRAIN

The 2018 Gold Wing is powered by a completely new engine. This flat six-cylinder motor with four valve heads offers increased power designed to go beyond the demands of the open road and deliver an incredibly responsive touring experience.

FORWARD / REVERSE WALKING SPEED DRIVE

The 2018 Gold Wing maintains its previous walking speed reverse gear, but for the first time ever also features a new walking speed forward gear, only available on DCT-equipped models.

BILL'S CYCLE

ADVANCED RIDE TECHNOLOGY

The true moto enthusiast in you will appreciate the responsive throttle-by-wire and traction of Honda Selectable Torque Control (HSTC). Plus, long distance rides just got more comfortable, with cruise control, heated grips and both front and rear heated seats.

NEW TRANSMISSION AND DCT

The Gold Wing now offers a choice between a new yet more traditional six-speed manual transmission or a technologically advanced seven-speed Dual-Clutch Transmission (DCT) – making the iconic Gold Wing one of the most groundbreaking touring bikes ever made.

SELECTABLE RIDING MODES

Switch between four selectable riding modes to easily find the power and performance to match your preferred riding style or road conditions. Choose between Sport, Touring, Eco or Rain modes to automatically adjust between engine, suspension and braking settings.

BILL'S CYCLE
POWERED BY **HONDA**

JOIN THE RIDE TO

THE FUTURE

Riding a motorcycle is all about the feeling of freedom and thrill of the ride. The all-new 2018 Gold Wing Tour equipped with third-generation Honda Dual-Clutch Transmission (DCT) represents our ultimate in both unmatched freedom and modern performance.

As the name Dual-Clutch would indicate, Honda DCT uses two clutches controlled by sophisticated electronics and hydraulics. One clutch, which rides on a hollow outer shaft, controls odd-numbered gear sets (1, 3, 5, 7); the other clutch rides on an inner shaft and controls even-numbered gear sets (2, 4, 6). Multiple gears are simultaneously engaged so that you're constantly prepared for the next shift. Data collected by a series of sensors are processed using an advanced algorithm to determine when the shift-control motor should electronically trigger gear changes. At those moments, one clutch disengages, and the other clutch is already engaged, resulting in shifts that are quick, smooth and seamless.

Honda is the powersports leader in Dual-Clutch Transmissions, having debuted it on the 2010 VFR1200F motorcycle and adapted, refined and expanded it to other bikes since — including the award-winning Africa Twin — and premium ATVs and rugged Side-by-Side vehicles.

GOLD WING | 2018

The third-generation seven-speed DCT that can be found in the all-new Gold Wing Tour may be new for 2018, but it is based on the same proven engineering technology you can count on. The groundbreaking seven-speed Honda DCT not only helps you ride easy and enjoy your motorcycle more, but also more importantly frees you up from having to deal with a hand-operated clutch or manually changing gears, which allows you to stay more focused on the adventure ahead. It lets you be in the moment when you ride, and once you try it, you'll see just how much more you enjoy riding and how little you miss shifting. Honda DCT is engineered to be the start of your best ride ever.

While both the manual transmission and the DCT version on the 2018 Gold Wing have the same final-drive ratio in top gear, the additional seventh gear in the DCT allows the lower gears to be more tightly spaced, resulting in less engine-speed drop when switching gears. Translation? The DCT transforms performance compared to the manual transmission when running up through the gears, plus there's minimal lag time between shifts.

Aside from functional differences, the Honda DCT-equipped Gold Wing Tour maintains the same direct shift feel as traditional manual transmission models, yet delivers quieter shifts and frees you from clutch- and gear-changing duty — creating a new dimension of motorcycle touring and convenience you simply must experience for yourself.

GOLD WING TOUR DCT AIRBAG
BILL'S CYCLE

REVOLUTIONARY FLAGSHIP
PERFORMANCE

Designed to push the limits of touring and adventure beyond anything imagined, the fully loaded flagship Gold Wing Tour DCT Airbag delivers virtually every feature you could imagine in a luxurious touring package.

BILL'S CYCLE
POWERED BY **HONDA**

Passionately shaped from every angle and expertly engineered from the inside out, it represents a modern twist to the classic Gold Wing. The continued evolution shows no signs of slowing down, with highly improved touring performance capability including integrated saddlebags and a top case, as well as a tall electronically adjustable windscreen, premium audio system with navigation and electronically adjustable suspension, plus upgraded stitching and special inserts on the side panels.

The Gold Wing Tour DCT Airbag model features a revolutionary Honda seven-speed Dual-Clutch Transmission (DCT) designed with long-distance touring in mind. Using two clutches controlled by sophisticated electronics and hydraulics to change gears quicker

and more smoothly than a traditional manual, it easily takes on clutch and shifting operations to allow more rider focus on acceleration, cornering and braking.

As the first motorcycle manufacturer to outfit a two-wheel model with an airbag back in 2006, the all-new 2018 Gold Wing Tour DCT Airbag model — as its name would imply — comes equipped with an innovative Honda airbag system that deploys in the event of a frontal collision.

Known for packing a powerful combination of advanced technology and game-changing performance, it's an experience like nothing you've felt before. After sitting in the saddle, you'll know exactly why it's held such legendary status for over 40 years and counting.

Equipped with an innovative Honda airbag system.

Designed with long-distance touring in mind.

BILL'S CYCLE

DISCOVER
TOURING FREEDOM

The well-equipped Gold Wing Tour has been 43 years in the making — engineered to enhance every road travelled along life's journey. Carefully packaged and built from the road up, the all-new Gold Wing Tour is a fully dressed tourer, complete with trunk storage.

BILL'S CYCLE
POWERED BY **HONDA**

There's a new engine and powertrain, advanced front suspension and a choice between a new yet more traditional six-speed manual transmission or a cutting-edge seven-speed Dual-Clutch Transmission (DCT) — making the iconic 2018 Gold Wing Tour one of the most groundbreaking motorcycles in its class.

The all-new and more agile body of the 2018 Gold Wing is also over 85 pounds lighter and has been jam-packed with the latest in technology, including Apple CarPlay™ integration and selectable riding modes.

Capitalizing on the lean and sporty stature of the 2018 Gold Wing, the luggage has been redesigned with sweeping integrated saddlebags that offer plenty of storage and a large removable rear luggage box specific to Gold Wing Tour models that easily accommodates supplies for two riders heading out on a long-weekend adventure. It's time to discover one of the most incredible touring motorcycles of its kind. After one ride, you'll know why it's nothing short of legendary.

EXPERIENCE
LEGENDARY STATUS

The open road is calling and there's only one way to answer it: the all-new 2018 Gold Wing. Lighter, more compact and technologically advanced than ever before, the standard Gold Wing has all the prerequisites of an incredible touring bike and even a few pleasant surprises hidden up its sleeve.

BILL'S CYCLE
POWERED BY **HONDA**

Featuring a more stripped-down style with attractive saddlebags and no rear trunk, this aggressive design with blacked-out components creates a more menacing appearance compared to the Gold Wing Tour.

The overall design of the all-new Gold Wing emphasizes the bike's legacy of performance and innovation, dating all the way back to its debut in 1975 — which forever changed the face of motorcycle touring. Its sharper lines hint at the impressive handling and addictive six-cylinder engine lurking underneath, and the brilliantly bright LED-formed “wing line” headlights pay homage to Gold Wing models of the past.

The latest generation of standard Gold Wing not only changes how you'll enjoy motorcycle touring, but also the way you'll think about touring on a motorcycle, period. Performance should not give way to comfort, and the 2018 Gold Wing is proof that you can truly have it all.

BILL'S CYCLE

POWERED BY **HONDA**

ULTIMATE PERFORMANCE TOURING MACHINE

Revamped, reshaped and reimagined for the first time in more than 40 years, the all-new Gold Wing once again redefines the touring motorcycle segment. The 2018 Gold Wing is a technological marvel that is packed with features. From, Apple CarPlay to preloading the suspension, it's important that you help your customers understand how to properly operate Gold Wing's many features. That's where a proper, 2018 Gold Wing-specific delivery presentation comes in.

Delivery is one of the most critical steps in the sales process. The delivery presentation is the perfect opportunity for you to show your customers how to operate the many features on their new Gold Wing. Additionally, everyone benefits from a proper, thorough and excellent delivery presentation.

- **CUSTOMER BENEFITS** — Increased satisfaction with the bike and the sales process, plus being able to safely operate all the features on the bike
- **SALES CONSULTANT BENEFITS** — Satisfied customers lead to repeat and referral sales, plus a stronger likelihood the customer will return to the dealership for service
- **AVOID NEGATIVE "PRESS"** — With the increased focus on social media reviews, it's more important than ever to make sure all customers are satisfied with their purchase and dealership experience

It's important that we provide every new Gold Wing customer with a thorough explanation and demonstration of its features and capabilities so they can get full enjoyment out of the ownership experience.

POWERED BY **HONDA**

QUALITY DELIVERY CHECKLIST (QDC)

The Gold Wing **Quality Delivery Checklist (QDC)** is a form to help ensure that the delivery process is well-organized and consistently exceptional for your customers. This QDC targets the bike's key "why buy" features. These may be features that are sometimes difficult to understand or require some additional operational insight from you.

GOLD WING

Quality Delivery Checklist

Date _____ Dealer _____
 Customer _____
 VIN _____
 Salesperson _____ Stock# _____

SERVICE

- ☐ Introduce to **Parts & Service** and explain warranty coverage
- ☐ **Maintenance** schedule and maintenance intervals

EXTERIOR

- ☐ Fairing pocket opening for fuel lid lever (colour label for Honda Genuine Parts ordering)
- ☐ **Smart Key System** operation with answer back button including the ignition lock
SMART Key code _____
- ☐ Explain the emergency trunk and saddlebags opening procedure
- ☐ Explain the emergency engine start procedure
- ☐ **Travel trunk*** and saddlebags release button (show tool kit within saddlebag)
- ☐ **Helmet Holder** with the release lever within saddlebag
- ☐ Show locations of: brake / clutch reservoirs, oil fill location and dipstick, and battery location

POWERTRAIN

- ☐ **Idle stop system** button and setting operation
- ☐ **Ride mode** buttons and functionality
- ☐ **Suspension preload** selection setting procedures
- ☐ Engage Drive and Neutral push button shifting on **Dual- Clutch Transmission (DCT)***
- ☐ **Walking speed** mode, forward* and reverse operations

*Only applicable if equipped

RESOURCES

- ☐ **Owner's Manual** with the bike or Contact Honda Canada to order a hard copy.
- ☐ Visit Honda Canada YouTube channel for **Get to Know Your Honda** related videos

SEATED

- ☐ **Electric windscreen** height adjustment and **windscreen ventilation louver** button
- ☐ **Clutch*/Brake** lever adjustment
- ☐ **Handlebar-mounted and centre console controls** and functions
- ☐ **Heated grips** and **heated seat** operation
- ☐ **Passenger seat heater*** switch operation
- ☐ **Parking Brake*** operation

INFOTAINMENT

- ☐ **Multi Information Display** screen including TPMS, low oil pressure, etc
- ☐ **Smartphone** and/or **Headset** Bluetooth pairing with dial/receive phone calls, access phonebook, and music streaming
- ☐ **Tune** radio with press and hold seek for strongest station, programming FM/AM Personal and/or Automatic Presets and changing audio sources
- ☐ **Navigation** using search bar for address, setting home location, search by places and categories and cancel route
- ☐ Connecting USB cable for **Apple Carplay™** navigation, music, text and recommend to leave cable in bike
- ☐ **Voice Control switch** buttons on handlebar for Siri (CarPlay) and explain system behavior

The listed items were inspected, explained and demonstrated to my satisfaction.

DELIVERY PRO TIPS: EXTERIOR

BILL'S CYCLE

HONDA SMART KEY SYSTEM

OVERVIEW

The Honda SMART Key System allows you to:

- Start the engine or place the bike in accessory mode
- Remotely unlock the saddle and trunk
- Locate the bike by flashing the lights and sounding the horn

DELIVERY TIPS

- Anyone can operate the ignition switch if the SMART Key is within operating range
- Deactivate by holding the ON/OFF switch for more than one second
- The mechanical backup key can be used to open the trunk or saddle bag in case of battery failure
- The SMART Key may experience interference in close proximity to mobile phones, laptops or when near radio towers, airports, or power stations
- The SMART Key uses low-intensity radio waves which may affect medical equipment such as cardiac pacemakers
- The SMART Key code allows the driver to manually start the bike if the battery in the key fob dies
- Write down the SMART Key code for your customer on the QDC
- The SMART Key code should be stored in a safe place on the bike, away from the SMART Key. This way, the rider can easily access the code if/when it is needed

DELIVERY PRO TIPS: POWERTRAIN

IDLING STOP SYSTEM

OVERVIEW

Gold Wing's Idling Stop System is designed to help reduce fuel consumption and noise by shutting down the engine while stopped, such as while waiting at an intersection.

The Integrated Starter Generator (ISG) allows for quick and seamless restarting of the engine when pulling away from a stop.

The Idling Stop System can be deactivated if the rider prefers.

DELIVERY TIPS

- The selected Idling Stop System (on/off) setting will be recalled each time the ignition is cycled
- The Idling Stop OFF icon will appear in the gauge display when disabled. The indicator will flash when the system has actively shut off the engine while stopped
- Idling Stop System will not become active until the engine is sufficiently warmed up and the motorcycle has been ridden at a speed above 10 km/h
- Idling Stop System will not engage if the transmission is in Neutral, the battery level is low, or if Hill Start Assist (HSA) is active

RIDING MODES

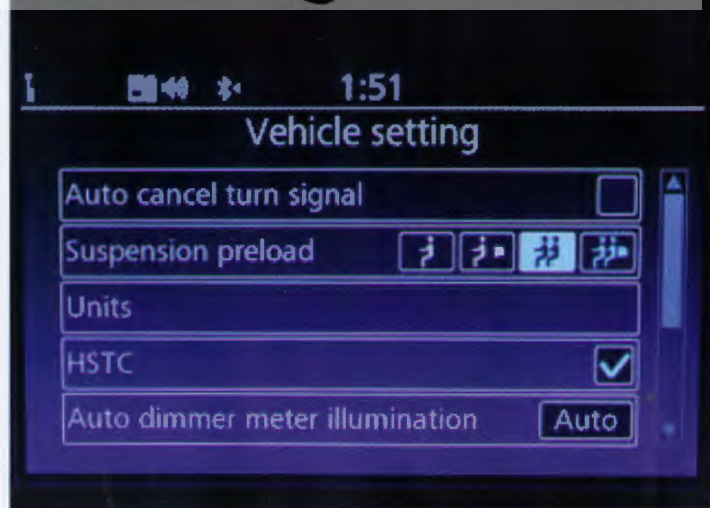

OVERVIEW

Gold Wing offers four unique riding modes, each designed for different driving styles and conditions:

- **TOUR mode:** Engine/braking feel and suspension damping optimized for comfortable long-distance riding
- **SPORT mode:** Quicker and more powerful engine feel, harder braking feel, and harder suspension damping. DCT shifting characteristics oriented to maintain middle and high engine speeds
- **ECON mode:** Gentle engine feel, DCT shifting characteristics oriented to maintain low and middle engine speeds
- **RAIN mode:** Gentle engine feel and softer suspension damping characteristics. DCT shifting characteristics are gentler than those with the default TOUR mode

DELIVERY TIPS

- The throttle must be fully closed before changing the Riding Mode
- The Riding Mode indicator will blink until the mode is fully changed
- Each time the ignition is turned on, the Riding Mode will automatically be set to the default TOUR mode

SUSPENSION PRELOAD

OVERVIEW

Gold Wing's suspension is adjustable to maintain optimal handling characteristics in a variety of load conditions.

- **ELECTRONIC PRELOAD:** Four models offer electrical suspension preload settings — rider only; rider and luggage; rider and passenger; rider, passenger and luggage
- **MANUAL PRELOAD:** Gold Wing models preload is manually adjustable by turning the damper adjuster knob located behind the rear side fairing cover

DELIVERY TIPS

- Electrical preload settings can only be changed while the bike is stopped with its engine running
- The preload settings status icon will flash while transitioning between modes and will become solid once the adjustment is complete
- If the icon continues to flash, the suspension may need to be serviced
- For manual preload suspension, 0=softest, 9=standard and 33=most rigid setting
- Do not turn the adjuster beyond its limits
- To return to the standard position, turn the adjuster counterclockwise until it will no longer turn. Then, turn the adjuster clockwise until it clicks — this is called position 0, which is the softest position. The standard position is 9 clicks from the position 0 (the minimum setting). (Total of 33 clicks)

DUAL CLUTCH TRANSMISSION/WALKING SPEED

OVERVIEW

Gold Wing offers an advanced 7-speed Dual Clutch Transmission (DCT) that provides effortless automatic shifting, or the fun of clutchless manual shifting using the +/- switches.

Dual clutches, one for the odd gears, one for the even gears, allows each clutch to prepare for the next gear change — providing uninterrupted power delivery.

Walking Speed Mode utilizes the DCT to provide easy push-button control for forward/backward manoeuvring at low speeds without using a clutch or the main throttle.

DELIVERY TIPS

- The DCT performs a self-check after starting the engine. “-” will appear in the shift indicator during this check and the gear cannot be changed
- The DCT will automatically switch to Neutral when the engine is started. The throttle must be completely closed and the wheels stationary to shift into AT Mode
- You cannot downshift using the MT Mode's “-” switch if the engine will exceed the rev limit
- The engine must be on in order for the Walking Speed to function properly

BLUETOOTH® CONNECTIVITY

OVERVIEW

Gold Wing provides the convenience and freedom of Bluetooth wireless connectivity, built right into its state-of-the-art infotainment system.

- Pair a mobile phone for hands-free communications
- Pair separate Bluetooth headsets for both driver and passenger
- Up to three Bluetooth device connections can be established at a time
- Wirelessly stream music from your device to enjoy over Gold Wing's speakers or Bluetooth headset(s)

DELIVERY TIPS

- Smartphones are paired/connected via the Audio Settings icon
- The Bluetooth pairing procedure can only be accomplished while the bike is stationary
- A Bluetooth® connection cannot be established while launching Apple CarPlay
- Gold Wing is not equipped with an intercom system between headsets. Some compatible Bluetooth headsets may offer this function separately
- In Private Mode, phone call audio will not be sent to the passenger headset

RADIO PRESETS

OVERVIEW

Gold Wing allows the rider to custom select radio presets, or use the "Auto" function to automatically save local stations to presets.

DELIVERY TIPS

- You can cycle through radio presets with the << or >> buttons on the left grip
- You can store presets manually via the "User" preset mode, or automatically by the "Auto" preset mode. Auto preset mode is ideal for storing radio presets in areas where you're not familiar with the local radio stations
- Weather band tip:
 - On the previous generation Gold Wing, there was a weather band button that was preprogrammed to access the weather station
 - On the new Gold Wing, we've eliminated this button, in part, to provide a cleaner centre panel design and have fewer buttons and controls on the bike
- Save your customer's weather station as a radio preset, so the customer can easily access weather information

AUDIO SYSTEM

OVERVIEW

Gold Wing's sophisticated audio system provides the perfect soundtrack for the road.

- Four available built-in speakers (two front/two rear) deliver excellent sound quality
- AM/FM radio bands with electronic presets
- USB input for connecting smartphones, iPods, flash drives, or other devices loaded with music
- Wirelessly stream music from your device to enjoy via compatible Bluetooth headsets

DELIVERY TIPS

- Certain features on the centre panel controls may be disabled while the bike is in motion
- Holding down the SOURCE button will mute the system. To unmute, press and hold the SOURCE button again
- While Apple CarPlay is connected, the TALK button is used to activate Siri instead of the default voice recognition system
- Do not leave a connected device in the storage compartments for a long period of time. Heat may damage the device. Keep the USB connector dry

APPLE CARPLAY

OVERVIEW

Gold Wing features integrated support for Apple CarPlay, allowing riders to access some of the core features of their iPhone using an incredibly simple and familiar interface on the 7-inch display screen.

- Leverage iPhone's Siri voice assistant technology, which can understand complex conversational questions and commands
- Access key iPhone features, including:
 - Phone
 - Music
 - Maps
 - Messaging
 - Podcasts and Audiobooks
 - Compatible third party apps (e.g., Spotify, Audible and more)

DELIVERY TIPS

- Only iPhone 5 or newer with versions of iOS 10 or later are compatible with Apple CarPlay
- You must confirm the CarPlay agreements on the phone and the display screen to complete the setup
- In addition to a USB connection, a paired Bluetooth headset is required for CarPlay
- The centre panel cannot be used to control CarPlay while the bike is in motion
- While CarPlay is connected, the TALK button is used to activate Siri instead of the default voice recognition system
- CarPlay will use mobile internet data for many of its functions

GPS NAVIGATION

OVERVIEW

Gold Wing continues to offer an advanced satellite navigation system to provide easy guidance to destinations across North America.

- Turn-by-turn spoken directions
- Graphical maps, including 3D views and traffic congestion
- Searchable Points of Interest (POI)
- Emergency directions, route planning and more

DELIVERY TIPS

- Only one navigation system can give directions at a time. If CarPlay navigation is active, the Honda Navigation System is not available
- Installing metallic accessories near the left saddlebag GPS antenna can seriously degrade GPS signal reception
- The centre panel cannot be used to control the navigation system while the bike is in motion
- Offer to help your customer store their Home Location as part of your demo
